

Bright from the Start

AWARD-WINNING
PURPOSE-BUILT
ENVIRONMENT

About us

Victoria Playpark (VPP) is a professional early childhood development centre affiliated with Victoria Educational Organisation that offers trilingual infant and toddler playgroup programmes led by teachers who are native in **English, Putonghua and Cantonese through our “one-teacher-one-language” approach.** Our **purpose-built environment, play-based curriculum** and **expert parenting strategies** support children to become curious, confident and well-balanced learners.

VPP is committed to promoting the **holistic development** of infants and toddlers (aged 8-36 months), and to ensuring their smooth transition to pre-nursery education. VPP's programmes are designed to stimulate children's curiosity about the world as well as to nurture characteristics that are key to their development into passionate lifelong learners.

♥ - Our 5 Approaches & 3 Learning Goals

Environment Inspired, Play-Based Curriculum

Victoria Playpark offers children aged 8 to 36 months a developmentally appropriate curriculum that fosters whole-person growth through encouraging children to learn by doing and by interacting with their peers.

Playpark Filled with Themed Activities

Our themed playpark activities offer a unique opportunity for both independent and collaborative learning. Children will first participate in whole-class theme-related activities, and then explore different parts of the park area on their own or with their peers.

Six Learning Stations

Our six diverse learning stations broaden young children's horizons, allowing them to discover their talent for art, music and cooking while developing their sensory and physical skills. Each learning station is equipped with age-appropriate tools and props for children to experiment with.

Gateway to Trilingualism

Our playgroup programmes promote multilingualism by exposing children to the wonders of storytelling, rhymes, games, music, multisensory play and social interaction in three languages: **English, Putonghua and Cantonese.**

Parent Engagement

We highly value parental engagement and involvement, and offer parenting workshops and seminars delivered by early childhood experts. We also offer a variety of family-centred events such as Expert Talks and PlayTime parent-child sessions.

3 Focused Learning Goals

We focus on three main learning goals for our young learners: **I CAN SPEAK** (communication skills); **I CAN FEEL, AND I CARE** (socio-emotional skills); **I CAN EXPLORE** (physical development and exposure to sensory experiences).

♥ - Our Programmes

Infant 8-12 months

Infants will develop concepts about themselves, their immediate surroundings and the people around them through partaking in a variety of play-based activities. **Sensory stimulation, gross and fine motor skills** are particularly emphasised in this programme. Infants will explore a range of materials, textures, sounds and smells using movement and their five senses. Our teachers will also offer important parenting tips and suggestions which can be incorporated into parent-child activities at home.

Toddler 12-24 months

Toddlers will be introduced to theme-based activities that take place in our six learning stations. Through these activities, children will learn to associate a particular theme with specific objects, people, and events, enabling them to form connections. Our programme will exercise toddlers' imaginations through symbolic play, **strengthen their gross and fine motor skills, language and cognitive development.**

Big Kid 24-36 months

Big Kids will be introduced to more advanced theme-based activities in our six learning stations. Besides learning to make connections amongst objects, people and events, children will be guided to use language to describe these connections, and to express their ideas and feelings during the learning activities. **To prepare children for a smooth to pre-nursery and kindergarten education,** a particular emphasis will be given to children's **self-care, socio-emotional and language development.**

♥- Our Other Offerings

PN/K1 Preparation Class

To help your child transition to new kindergarten school life with ease, Victoria Playpark is introducing a PN/K1 Preparation Class from April to July. The class will help your child develop independence, self-management and communication skills, while introducing the International Baccalaureate (IB)'s Primary Years Programme through inquiry-based learning.

Various activities, classroom routines and timetable arrangements aligned with the PN/K1 programme are included to help children transition into their new environment.

A graduation ceremony (including certificate and photos), festival celebrations and monthly birthday parties will be arranged.

PlayTime

**Sunday and Public Holiday
Parent-Child Activities
at K11 MUSEA**

Victoria Playpark K11 MUSEA Centre holds PlayTime sessions on Sundays and public holidays. This special 40-minute activity for children aged 1-5 years old (accompanied by an adult) features arts and crafts and play time in the special park area.
